EXPERIENCE

SOWINGO; TORONTO, ONTARIO – 2020-2024

SENIOR FRONTEND ENGINEER – FEBRUARY, 2023 - NOVEMBER, 2024

- Took ownership of feature creation and enhancement from initial concept to deployment
- Spearheaded modernization of codebase and establishment of new revenue streams
- Reviewed pull requests, managed releases and hotfixes for staging and production
- Created documentation, UMLs, flow charts, RCAs, and other visual aids
- Onboarded, trained, and mentored junior developers and interns
- Led hiring process of new engineers and non-technical staff
- Leveraged **Parcel** to embed new widget into specialist websites using **GTM**

WEB DEVELOPER – DECEMBER, 2020 - FEBRUARY, 2023

- Architected **React** submodule with **TypeScript** to embed within legacy **Angular** app
- Integrated **React Query** and **Mock Service Worker** into the development workflow
- Incorporated **Jest**, **React Testing Library**, and **Playwright** to facilitate CI/CD with **GHA**
- Created, maintained, and enhanced features, including unit, integration, and e2e tests
- Collaborated with product managers, UI/UX designers, QA team, and backend developers

Other tools and technologies include **JavaScript**, **HTML**, **CSS**, **Sass**, **Less**, **PrimeReact**, **Cypress**, **Git**, **Github**, **Jira**, **Confluence**, **Figma**, **Visual Studio Code**, **Sublime Merge**, and **Slack**.

PROJECTS

goat-vote.com (est. 2022) allows users to vote on which athletes are the best of all time and of the current season. Uses **React** with **Vite**, **Node** with **Express**, **TanStack Query**, **TanStack Router**, **TypeScript**, **Tailwind**, the **Wikimedia API**, **AWS S3**, **Redis**, and **MongoDB** with **Mongoose**.

[maxWellness](https://maxwellness.com) (est. 2019) is a **Progressive Web App** for tracking workouts and is roughly the tenth iteration of the first application I ever created. Relies on the **Next Pages Router**, **TypeScript**, **Tailwind** with **shadcn**, **Vitest**, **React Query**, and **Firebase**.

margaretmonis.com (est. 2023) is my mom's blog, which I built with the **Next 15 App Router**, **React 19** with **RSC**, **TypeScript**, **Tailwind**, **Nodemailer**, **GraphQL**, **DatoCMS**, and **Firebase**.
